

Water District Meeting

March 2, 2009

Water District #2

Sewer District #1

Water Improvement District #1

Established approximately 15 years ago

All water Town Owned

\$350K to do project, (\$100K was a loan, the rest was a grant)

We need to turn this Improvement District into an actual District, just a matter of time and paperwork.

This Improvement District included: Orchard Park, Park Road, Broadway, Part of North Pearl, Part of Drake, and Part of Duck Pond.

When the County went into the water system, they paid off our loan. However, any major repair outside of individual homes would come from the Town.

A question proposed: Does transmission line on South Pearl Street become part of Water District #1? Village would have to give to Town.

Water Improvement District 2 & Sewer Improvement District #1

Funded by the whole Town outside Village

Houses and school to the old Keebler Building

Town outside Village paid \$35K per year, County Sales Tax money pays for this, and therefore it does not show on taxes.

This burden will be paid off in 2 years

\$22,500 paid to CATCO is a part of this debt

BAN from the Town-Town lending money to both districts, then piece with school district one.

No Sewer District in Town, however some Town residence are connected.

Sewer District #1 will match Water District #1

29 total sewer users in the Town as of this meeting

Town needs to consider adding Sewer Districts 2 & 3

Water Districts 2 & 3

#2-The Town does qualify for a grant and loan

Town in final process of final application for funding

Waiting on final approval from State

State Ag & County must also sign off on this project

Water District #3

The Town is moving ahead with the initial qualifying application

The one item the Town needs to pay close attention when the time comes is the CHARGING ORDINANCE. This ordinance must support handling expansion to the campsites on Fox Road.
